Pews are fabricated in backs & seats commonly referred to as pew bodies.

Supports are attached to the back and seat of the assembled pew body.

Pew ends are interchangeable on all pew bodies we manufacture.

Our combined solid and laminated construction offers you the most durable oak pew for your worship space...pew ends are made of all solid or combined 7 ply techniques as each style requires...the cross section view of a typical pew body/support outlines our basic assembly for fine church furniture.

**CROSS SECTION VIEW**

**COMBINED SOLID & LAMINATED CONSTRUCTION**

**STEPS TO PEW BODY SUPPORT CONSTRUCTION**

1. Solid oak edge rails front and rear glued and stapled to 3 ply composite particle-board core.
2. High density wood cross banding applied over support panel.
3. Solid oak veneers applied over cross banded panel.

Kneeler and portable supports are fabricated in same manner...and because of the superior strength of this proven technique, all supports can be tapered offering maximum walking and seating space.

**EXCLUSIVE THREADED INSERT/BOLT FASTENER SYSTEM**

**1" MEDIUM POLYFOAM**

**1 1/2" DENSE POLYFOAM**

**TWO PIECE STRUCTURAL DOUGLAS FIR NOSING**

**INDUSTRIAL 3/4" PARTICLEBOARD 3 PLY BASE**
